

Digital Ultrasonic Stirrer

Efficient Mixing | Uniform Results | Advanced Technology

The Digital Ultrasonic Stirrer is a compact, high-performance machine designed to provide consistent and uniform mixing of liquids using ultrasonic technology. It is ideal for laboratories, research institutions, and industrial applications where precision and reliability are essential.

Ultrasonic
Mixing

Digital
Control

Reliable &
Durable

Easy
Operation

Key Features

- ✓ **Digital Display**
Clear and accurate digital readout for precise control and easy operation.
- ✓ **Ultrasonic Stirring Technology**
Provides fine and uniform mixing, eliminates clumping and ensures better sample homogenization.
- ✓ **Adjustable Speed / Power**
Up / Down buttons for convenient control of stirring intensity.
- ✓ **Safe Operation**
Equipped with safety warning label to prevent operation without sample.
- ✓ **Sturdy Build**
Made with high-quality, durable materials for long-lasting performance.
- ✓ **Compact Design**
Space-saving design suitable for any laboratory or industrial setup.

Mixing Made Smarter

Technical Specifications

Display	Digital (7 Segment)
Control Buttons	Start/Stop, Up/Down
Stirring Technology	Ultrasonic
Power Supply	220 V AC, 50 Hz (or as per requirement)
Body Material	Mild Steel / Powder Coated Finish
Stirrer Material	Stainless Steel
Machine Dimensions (Approx.)	As per model (Customizable)
Weight (Approx.)	As per model (Customizable)

Applications

Laboratories &
Research Institutes

Food & Beverage
Industry

Pharmaceutical
Industry

Paints & Coatings
Industry

Chemical
Industries

Industrial
Processing

Ideal for mixing, dispersing and
homogenizing a wide range of liquids
with superior efficiency.

HIGH PERFORMANCE
Consistent & Uniform Mixing

USER FRIENDLY
Simple Operation

SAFE & RELIABLE
Built for Long Life

MAKE A DIFFERENCE
Better Mixing, Better Results
